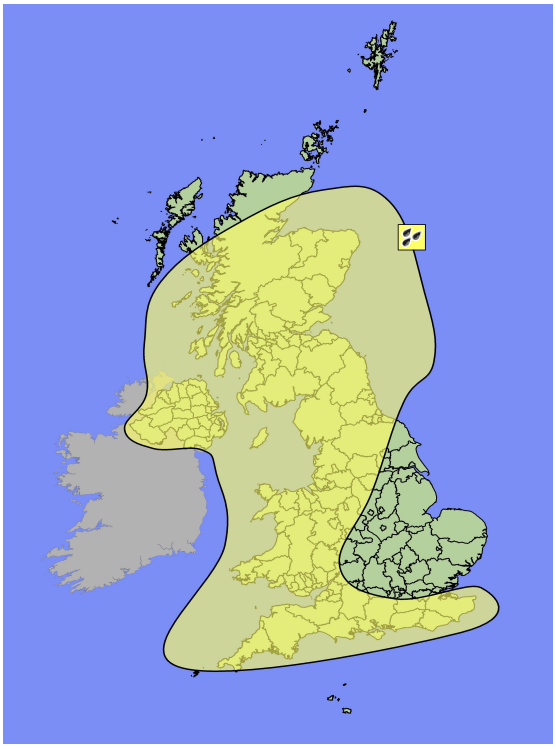
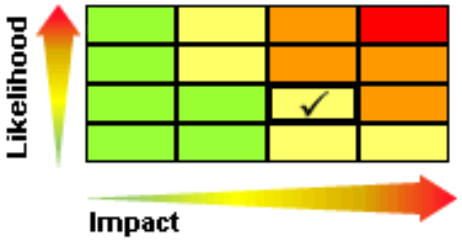
National Severe Weather Warning Service





Chief Forecasters Assessment
The area of low pressure which will lie close to the Scottish Border around midday today will drift southwestwards to be lying close to Anglesey by late this evening. Rain will continue to affect many parts, and will be particularly heavy across northern England and north and west Wales. Meanwhile further bands of heavy and possibly thundery showers are likely to affect southern areas.

Very strong winds are likely at first across Scotland and will transfer to much of Northern Ireland today with gusts of 50 to 60 mph.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **00:00 on Tue, 25th Sep 2012** until **23:59 on Tue, 25th Sep 2012**

Further rain or showers, heavy and persistent in places, are likely for the rest of today. The rain will be accompanied by gales for a time across much of Scotland and Northern Ireland.

The public should remain aware of the potential for further localised disruption due to heavy rain and/or the very strong winds.
